NMMA CERTIFIED TRAILERS

The National Marine Manufacturers Association (NMMA) has developed a boat trailer certification program. An NMMA Certified Trailer is one that is built by a manufacturer that complies with established industry standards and federal safety regulations. The certification tells the consumer that the boat trailer's design meets the standards set forth in the NMMA Trailer Certification Handbook. The standards are based on those published by the Society of Automotive Engineers (SAE) and in the Code of Federal Regulations (CFR) Title 49. Look for the NMMA Certified label when shopping for your next boat trailer.
